Profile

Student in Software Engineering seeking entry level position in software design and development to continuously sharpen my skills and grow within the industry. Equipped with an extensive career in leadership providing excellent communication and interpersonal skills enabling my adaptability to the work culture of any given company. A team oriented fast learner with strong time management, sense of urgency, and the ability to multi-task. Highly driven professional possessing a strong work ethic in team or individual settings to help drive product success and increase efficiency. Exceptional troubleshooting and problem solving skills with an analytical mindset to quickly learn and master new technologies across multiple platforms.

Employment History

Drug Store Manager at Walgreen Co., Austin

March 2005 – April 2016

- Responsible for planning and maintaining work systems, procedures, and policies that enabled and encouraged the optimum performance of employees and other resources within the store.
- Led employees using a performance management and development process that provided an overall context and framework to encourage employee contribution and includes goal setting, feedback, and performance development planning.
- Consciously created a workplace culture that was consistent with the overall fit of the company and emphasized the identified mission, vision, guiding principles, and values of the organization.
